1. The following is an examiner's statement of reasons for allowance: The claims have been allowed because claim 1 recites a versatile label dispenser having a peeling blade to separate the labels from the backing sheet. There is a movable sweep bar to deflect the backing sheet over the blade, with the labels partially separated from the backing sheet. There is a decurling structure to bend the sheets in a direction opposite from a predetermined direction. There is a means to advance the label sheets in accordance with information read from coded information. Claim 6 also recites the label dispenser having a peeling blade to partially separate the labels. The label sheets have coded information thereon and an electrical circuitry to sense the coded information to advance the sheet assemblies. There are sensors to sense the presence of the partially dispensed labels and to sense the leading edges. The circuitry advances the sheets in accordance with the sensed information. Claim recites the matter of claim 6 along with the electrical circuitry actuating a sheet feed device to incrementally advance the sheet assemblies by the spacing between the leading edges of successive labels, when the sensors indicate that the partially separated labels have been removed. Claim 12 also recites the matter of claim 6 and the coded information indicates the presence or absence of a supplemental die cut at the end of a label sheet. The dispenser delays forcing the upper edge of the label sheet over the peeling blade until after the supplemental die cut has passed over the blade.. Claim 13 also recites matter of claim 6 and wherein a validation symbol or pattern is provided on the leading edge of each sheet. The system scans the symbol or pattern and dispenses the labels only if the

pattern conforms to a predetermined validation pattern. The above matter in the claimed invention is not disclosed nor fairly taught by the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth W. Noland whose telephone number is (571) 272-6941. The examiner can normally be reached on Monday-Thursday, each week.
